<b>Why This Inspection?</b>  Motor oil protects your engine against wear caused by friction. To prevent problems, it is important to perform engine oil change assiduously on your vehicle.  At the same time, your technician will check every other fluid in your vehicle, including engine coolant, which protects the engine from intense heat, as well as transmission and brake fluids.  During the same visit, your technician will also verify the air, fuel, and transmission filters and change the oil filter. Clogged filters can impair the performance of your vehicle.	<b>Under the Hood</b>				
	<input type="checkbox"/> Brake Fluids Level: _____ Condition: _____	<input type="checkbox"/>	<input type="checkbox"/>		
	<input type="checkbox"/> Power Steering Fluid	<input type="checkbox"/>	<input type="checkbox"/>
